FAQ

How to active Solar Star Light

1. Connect solar panel to solar controller, light system will light on automatically after 10 seconds if no sunlight above panel. Or press remote controller, it will light on immediately.
2. If you want turn off solar star light, please press "OFF" or disconnect wires.

Attention: Take out plastic card when use it, put inside if do not use it.

Why Solar Star Light do not light on?

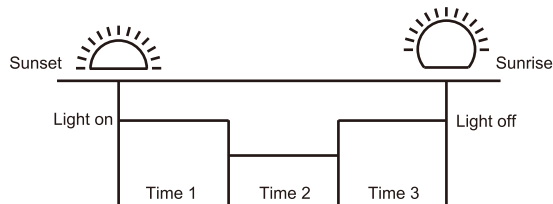

1. Make sure activating succeed when first time using.
2. To avoid someone pressed "OFF" accidentally, please press "ON" to test it, if it can light on normally, then press default mode like "L".
3. If still do not light on, please check indicator lights' situation, one indicator light flash means overdischarged. It may caused by objects upon solar panel, please clean it. Or it caused by weak sunlight recently, please check it again after bright sunlight day.
4. If above information still can't solve your problem, please contact sales team directly, we will happy to serve you all the time.

Does it need clean surface of panel?

Yes, it is needed to clean surface regularly according to the gravity of the dust in local city.

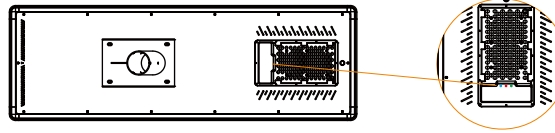

Does the lamp light on automatically?

Yes, it will light on automatically at darkness no matter which mode except "OFF"
